Emergency Action Plans (EAP)
Facilities Information, Campus Maps, and Building Floor Plans are used to develop and maintain Emergency Action Plans.

Space Planning
Facilities Information, Campus Maps, and Building Floor Plans are used for space planning projects at multiple levels in the University
- Department
- College
- Campus

Reporting and Analysis
Facilities Information is used to evaluate and compare operations and maintenance projects. Develop and implement space projection models to forecast current and future space needs. Support all analytic efforts of the University’s internal and external requests for report development, quality assurance, and analysis.

Scheduling
Facilities Information is used in the University scheduling system.

Reporting
- THECB
- NSF
- Ad-hoc reporting

Services
- Relocation Services
  - Deliver space evaluations
  - Facilitate the logistics of departmental moves
  - Provide excellent customer service.

- Floor Plans
  - Whole buildings
  - Specific suites or rooms
- Campus Maps
  - Created to suit specific need
- Space Analysis
- Space Optimization
- Custom Facilities Reports

Tools
- Virtual Information Portal (VIP)
- Request Management System (RMS)
- Space Use Survey (SUS)
- Facilities Inventory Dashboard and Report Portal

Facilities Inventory Operating Policies & Standards
- Room Numbering
- Teaching Space
- Move Approval
- Internal Footprint Communications
- Footprint Expansion Projects
- TTU Space Optimization Standards

Register
- Training
- Space Controller
- Space Coordinator

Facilities Certification Options
- Annual Certification
- Live Certification
